Work Experience:

Prodigy InfoTech   Jun 2024 - Jul 2024

Full-Stack Web Developer Internship

• Gained hands-on experience in full-stack web development, contributing to innovative projects.
• Collaborated with a talented team to design, develop, and deploy web applications.
• Utilized technologies such as HTML, CSS, JavaScript, Django, PostgreSQL.
• Developed and integrated dynamic features, enhancing user experience and functionality.

Project:

1.Food Ordering System in Web Application Built Using Django.
The food ordering system is a web application built using Django. It allows users to browse menus, select items, and place orders. The system is designed to be user-friendly and efficient, catering to both restaurant owners and customers.

2.Project On Adaptive Learning in Smart Homes and Personalized Environments Through Emotion Driven Automation in Deep Learning With IOT.
The integration of facial emotion detection and deep learning technologies in smart homes is revolutionizing comfort and well-being by automatically adjusting temperature, lighting, music, and screen content, resulting in a personalized living environment.

3.Banking System in Web Development.
Internet banking, or web banking, enables customers to do transactions on a bank's website, reducing costs by cutting down on branches. It's convenient, letting you do transactions anytime. You can check balances, get statements, see transactions, transfer money, and make payments.

Certificates:

Completed the certification course on full Stack web development in Udemy .View certificate
